

STEMS *FIRST*

NATURAL WINE, POURED SIMPLY

Brand Guidelines — v1.0
Prepared for freelancer / designer use
August 2026

PRIMARY MARK

Use official supplied logo files (SVG / PNG / EPS) for all production work — this mark is shown here only to illustrate spacing and sizing rules below.

COLOR PALETTE

Ink Black
#201D18
Logo, type,
linework

Bone White
#F6F1E6
Primary
background

Burgundy
#7B2D3B
Red wine accent

Amber
#D98B3F
Orange / skin-
contact

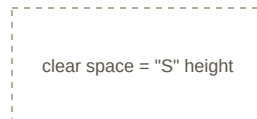

Moss Green
#5C6B47
Vine / secondary
accent

MINIMUM SIZE

Never scale the full mark (glass + wordmark) smaller than **0.75 in / 20 mm** wide in print, or **120px** wide on screen. Below this the linework and lettering lose legibility.

CLEAR SPACE

Keep open space around the mark equal to the height of the letter "S" in "STEMS" on every side. No text, imagery, or edge of page may enter this zone.

PLACEMENT & COLOR

Use the black mark on Bone White or light backgrounds. Use an all-white reversed version on Ink Black or Burgundy backgrounds only. Never place on busy photography without a solid contrast panel behind it.

TYPOGRAPHY

HEADLINES / DISPLAY

Fraunces

Warm editorial serif — event titles, menu headers, signage

BODY / UI

Inter

Clean grotesk — web copy, labels, social captions

ACCENT (SPARINGLY)

Caveat

Hand-lettered feel echoing the logo — chalkboard signs, quotes only

STAYING ON-BRAND

DO

- Use the logo only in its approved black or reversed-white versions, at or above minimum size, with full clear space respected.
- Keep layouts airy and unfussy — generous white (bone) space, one accent color per piece, natural/organic textures (paper, wood, linen).
- Pair Fraunces headlines with Inter body copy, and let hand-poured, low-intervention language carry the voice (warm, direct, a little playful).

DON'T

- Don't stretch, skew, rotate, recolor, or add drop shadows / outlines / gradients to the logo.
- Don't place the mark on clashing colors, low-contrast backgrounds, or busy photography without a solid backing panel.
- Don't substitute brand fonts with system defaults (Arial, Times New Roman) in finished materials, or mix in more than one accent color at a time.
